

Dear Parents,

Communicating with parents and staff during an emergency is an important component of our school's Emergency Plan. In the event of weather-related emergencies, earthquakes, fires, police activity or any non-scheduled school closure, we may need to contact you with information that will help maintain order while maximizing school resources.

As part of our communication strategy, we are implementing **K12mobile School Emergency Broadcasting System**. K12mobile will enable us to send a text message all participating mobile phones and email addresses in a matter of minutes. Best of all, it keeps our phone lines clear for other important calls, and can function even if local "land lines" are overburdened.

Please input your mobile phone number and email address at K12mobile.com. The school has paid for this service as part of our Emergency Plan. Most phone companies do not charge you to receive a SMS text message. Please verify with your phone company for more information.

- Go to <http://www.k12mobile.com>
- Click Register, then "continue" under Parent Registration
- Complete the registration form to input your cell phone number and email address. Our school zip code is _____.
- Login anytime to add more contact numbers, or to update your own information. Write down your username and password here:

Username: _____

Password: _____

Follow instructions included with your phone for receiving text messages. If you don't have a mobile phone, enter the name/number of a designated relative or friend to receive emergency notifications for you.

We appreciate your participation to make this program effective. K12mobile will not replace tradition methods of communication, and always watch your local news for important announcements regarding school closures. With your cooperation we can add text message broadcasting as an extra level of communication in case of emergency.

Thank you,
